**CGATE STANDARD SERIES**

**CRYSTAL FRAME SUPER SLIM LIGHTBOX**

The light source for these units is a Cold Cathode Fluorescent Lamp (CCFL). These lamps consume approximately 30% less power than the T-5 tubes used in other lightboxes, for the same light emission, thus allowing smaller ballast, lower weight and thinner enclosure.

CCFL tubes are extremely durable and typically last about 20,000 hours. They are shock and vibration resistant. While the bulbs are very thin and made of glass they are generally protected by an acrylic or polycarbonate tubing.

Suitable for indoor use.
